

IWU Library Gale Database Guide

When you choose Gale, formerly Infotrac, you see more than 10 databases including *Academic Onefile*, *General Business File ASAP* and *Opposing Viewpoints*.

Academic Onefile defaults to a **Subject Guided Search**. Switch to **BASIC Search** by clicking on **BASIC Search** on the top menu, then begin the search.

Click More Search Options to limit a search to peer-reviewed publications, documents available in full text, a specific date range or specific publication.

Avoid common words and generic terms.

Search with the fewest, most specific words.

Poor Basic Search Example

stem cells taken from unborn babies and embryos

Yields 0 results

Better Basic Search Example

embryonic stem cells

Yields over 3389 results. Peer Reviewed limits the results to 2003.

Subject searching may yield fewer, more relevant results.

Subject Guide Search

Find: Search

Find subject terms that contain words you entered

Yields over 1178 results. Peer Reviewed limits the results to 628.

If there are too few results, try broadening your search with less specific terms.

If there are too many results, try narrowing the search with more specific terms.

For further help with Gale click the help icon or ask an IWU Librarian.

Click full-text and/or peer-reviewed items to limit results.

Mark items to select them for viewing, printing or emailing.

Printing

To print, click **Marked Items** on the top menu. Then select from the Tools menu to print, email, or download results.

What to do when you find a citation without full text

Check the **Journal Title Search** list to see if the Library provides access in some other format or database. With access to 31,000+ titles in over 100 databases, your article may be available in full text from another source.

When printing PDFs, use the control bar for Acrobat, not the Internet browser.

Click here to print, rather than using the File, Print menu option.
